

Chemical Inventory and Barcoding

EHS is proud to announce the new system-wide chemical inventory system (CIS) is available, and your inventories have been uploaded for you.

To access the program go to <http://ehs.ucmerced.edu/research-safety/chem-inventory>

1. Log in with your single sign-on:
 - Select PI or Authorized User. An authorized user must list a PI.
2. Maintain your inventory:
 - EHS will add hazardous materials; however, non-hazardous materials must be added by the lab. The number “1” in the barcode field indicates the material has been ordered, but not received by EHS.
 - If your lab received it, please remove the number “1”.
 - EH&S supplies the barcodes if you prefer to use them.
3. Remove chemicals when consumed:
 - If they will be reordered, change quantity to the number “0” and remove barcode in CIS.
 - Alternatively, send the barcode stickers with your chemical waste pickup or campus mail them to EH&S. We will then remove the chemicals for you.

Helpful hints:

Save often! The program does not automatically save your work.
