

Cal OSHA Carcinogen Report of Use (5209)

Name: _____ Room used: _____ Date: _____

I am using (circle all that apply):

- | | |
|---------------------------------------|--------------------------------------|
| 2-acetylaminofluorene | beta-propiolactone |
| 1,2-dibromo-chloropropane | bis-chloromethyl ether |
| 1,3-butadiene | cadmium (any compound) |
| 3,3'-dichlorobenzidine(and its salts) | chromium VI (any compound) |
| 4,4-methylene bis (2-chloroaniline) | ethylene dibromide |
| 4-aminodiphenyl | ethylene oxide |
| 4-dimethylaminoazobenzene | ethyleneimine |
| 4-nitrobiphenyl | formaldehyde |
| acrylonitrile | lead (any compound) |
| alpha-naphthylamine | methyl chloromethyl ether |
| arsenic (inorganic) | methylene chloride |
| asbestos | (dichloromethane) |
| benzene | methylenedianiline (MDA) |
| benzidine (and its salts) | N-nitrosodimethylamine |
| beta-naphthylamine | vinyl chloride |
| | I do not use any of these chemicals. |

Briefly describe the process which workers are exposed to carcinogens:

What quantities are used per experiment? _____

What is the largest size reagent bottle of listed carcinogen used? (500g, 1gal, etc.) _____

Explain exactly where in the room the carcinogens will be used. (fume hood number, left bench, etc) _____

Are any operations done outside a fume hood? (Dispensing, weighing, etc.) Explain.

Number of employees affected? (Consider students employees) _____
